REQUESTED BY:

Name: _____
Address: _____
Email: _____
Phone: _____
Cell Phone: _____

Inspector's name: _____
Reason(s) for inspection: _____

Type of inspection requested: ☐ Visual ☐ Technical ☐ Invasive

Date of request: _____

- 1. Visual Inspection:** This inspection includes the following:
- Measurements of clearances.
 - Opening stove doors and all ground-accessible dampers/clean-out doors.
 - Visual inspection of the chimney from the ground.
 - WETT report documenting all noted deficiencies and red flags that may require a more detailed inspection, including all mandatory photos in the WETT Inspection Standards of Practice (SOP).
 - Easily visible portions of the flue (such as first tiles of an open fireplace or top section if the inspector has accessed the roof).

- 2. Technical Inspection:** This inspection includes the following:
- All visual elements of the system as indicated in **Visual** Inspection.
 - Hands-on work which may include:
 - Taking apart flue pipes,
 - Opening clean-outs,
 - Entering the attic to view additional system components,
 - Accessing the chimney on the roof.
 - Review of condition of components removed or exposed through hands-on work and quantity of creosote noted in components and where visible in chimney sections.
 - All observations and recommendations documented on WETT Inspection forms, including work completed and areas accessed, along with all mandatory photos.

- 3. Invasive Inspection:** This inspection includes the following:
- All visual elements of the system as indicated in **Visual** Inspection.
 - All hands-on work as indicated in **Technical** Inspection.
 - General construction work to building elements including:
 - Opening of walls or ceilings,
 - Disassembly or invasive work on masonry or prefab chimneys,
 - Examination of chimney liners,
 - All observations and recommendations documented on WETT Inspection forms, including work completed and areas accessed, along with mandatory photos.

INSPECTION LOCATION: ☐ Same as requested or:

Name: _____
Address: _____
Email: _____
Phone: _____
Cell Phone: _____
WETT #: _____

Date of inspection: _____

- Inspection Results:** Indicate inspection results for each component. **Code compliance** = proper use of listed components. N/A = Not Applicable. UTI = Unable To Inspect.
- Suitable (Suitability)** refers to system components that appear to be mechanically and structurally able to provide their designed and intended function.
- Unsuitable** refers to components, or parts thereof, that are not mechanically or structurally suitable to maintain the function they were intended to perform.
Note: an appliance that has been modified is no longer a certified appliance.
- This inspection report only documents the conditions at the time of inspection.
- All **non-compliance** ratings should be considered for comment. See "Comments" page(s).
- An inspection, at any level, can be expected to include some components marked **UTI**.
- Manufacturer's specific instructions/**CSA B365**/building code shall be used to complete this inspection form.
- Appliances are not fired as part of an inspection. This is not a performance inspection.
- The electrical system is not part of a solid-fuel inspection.
- Documentary evidence, including a valid certification number of the attending WETT-certified professional, is a mandatory requirement of the inspection process.
- Persons signing a declaration must have physically inspected the work.
- Use one inspection form per appliance. In a multi-chimney situation, this inspection form is limited to the related appliance.
- Inspectors are checking for **"Code Compliance."** They do not "Pass" or "Fail."
- Inspectors do not certify the appliance or the installation.
- Inspectors do not issue a WETT certificate with an inspection, they issue an inspection report.

69. Fire Code = 2.6.1.4. Chimneys, Flues and Flue Pipes

(1) Every chimney, flue and flue pipe shall be inspected to identify any dangerous condition

a) at intervals not greater than 12 months, **b)** at the time of addition of any appliance, and **c)** after any chimney fire.

70. Fire Code = 2.6.1.4.

(2) Chimneys, Flues and Flue Pipes shall be cleaned as often as necessary to keep them free from dangerous accumulations of combustible deposits.

Appendix A – A.2.6.1.4 (2) The presence in a chimney of deposits of soot or creosote in excess of 3 mm thick will indicate the need for immediate cleaning, possible modification of burning procedures and more frequent inspections.

(Amount of creosote should be noted in comments section.)

71. Fire Code = 2.6.1.4 3) A chimney, or flue pipe shall be replaced or repaired to eliminate

a) any structural deficiency or decay

Appendix A – A.2.6.1.4 (3) (a) Structural deficiencies are deviations from required construction, such as the absence of a liner or inadequate design of supports or ties. Instances of decay are cracking, settling, crumbling mortar, distortion, advanced corrosion, separation of sections, or loose or broken supports

72. Fire Code = 2.6.1.4. 3) A chimney, flue, or flue pipe shall be replaced or repaired to eliminate

b) all abandoned or unused openings that are not effectively sealed in a manner that would prevent the passage of fire or smoke.
