<p>We are assuming there will be a major renovation. At that time a line would have to be run over to the basement and the equipment would be installed in the back right corner.</p> <p>We would also recommend redoing the well system by welding a casing on so its above ground and reeding the pipe and wire at least going to the house because the pump isn't grounded currently. This work would all be extra.</p> <p>But to install the custom designed, commercial quality salt removal system would be \$21,900 +hst</p> <p>A flow test should be done so we can confirm there is enough water to run to the unit.</p> <p>Custom designed, commercial quality salt removal system with all upgrades including stainless steel package, stainless re-pressure pump, larger size Fiberglas tank, 300 gallon storage, Viqua high output ultra-violet light with 5 micron cartridge filter, Computerized iron sediment filter, PH boosting filter.</p> <p>No salt upgrade option included</p> <p>Electrical extra</p> <p>This system is exclusive to Jeff Byron Pumps & Water Treatment. It has been proven for over 18 years. We make several changes to this unit that separates us from our competitors.</p> <p>For more information or if you would like this explained in further detail please feel free to call.</p>	1.00	\$21,900.00	\$21,900.00
H		13.00%	\$2,847.00
