

Welcome to 136 Old Hungerford!

We were so excited to move to the country in 2007 to start our retirement years. We loved the house the moment we saw it. In the summer, the tree foliage provides a privacy wall of nature. We are surrounded by a variety of birds, wildlife, conservation parks, lakes and rivers. Vanderwater Conservation is only a 3 minute drive from the house.

Over the years, we have added flower beds, shrubs and perennials to create our beautiful gardens. It has been a labour of love.

The gazebo allowed us to enjoy nature up close, to hear the singing of the birds and the wind whisper gently through the trees. The heaters prolong the season into the cooler autumn and early spring evenings. It truly is a piece of heaven.

The workshop/studio is a special place to pursue artistic endeavours. After a day of building or painting, it was wonderful to pull up a chair around the wood stove, feel its warmth and contemplate a job well done.

It is time for the next chapter. We leave with the best of memories!
